1) Imagine you are on Refinement Metting , please write down the comments you will do to your PO about the User Story definition and the Acceptance Criterias he/she has written down.

If i have these user story i would like to ask to my PO the following questions:

- What is the maximum number of results that should appear on each page?

- Should the displayed results be sorted in any specific way?

- Can the results displayed in the query be sorted by different columns?

- What should be displayed in the query if no results are found?

- Why do some of the results appear with a gray background while others have a white background?

- Should the number of obtained results be indicated to the user?

2) Please create the test cases for this User Story?

Feature: Search functionality for the books list
  As a user
  I want to be able to search on the book catalog
  so that i can find the books i am looking for
  Scenario: Refresh books list
    Given The user is in book list page
    And The Input search box is displayed
    And The input search box button is displayed and clickable
    And The List books is displayed
    When The user introduces text in text input
    Then The books list refresh and show the number of books that contains the text that was introduce.
